Clinical Examination and Manual Therapy of the Recurrent and Chronic Low Back Pain

Diagnose Precisely. Treat Effectively.

Course Objectives

At the conclusion of this program, the learner will have...

- An exact knowledge of pathoanatomy, physiology, and biomechanics of the lumbar spine (as related to secondary disc-related disorders).

- The ability to perform a concise clinical segmental examination of the lumbar spine (as related to secondary disc-related disorders).

- Methodology for interpreting the clinical examination to reach a precise clinical diagnosis in secondary disc-related pathology of the lumbar spine.

- The ability to perform an effective treatment through an accurate understanding of surface anatomy and tissue physiology of the lumbar spine (as related to secondary disc-related disorders).

- The most effective techniques for local segmental mobilization of the lumbar spine (as related to secondary disc-related disorders).

- Combine soft tissue and specific articulation techniques to affect total treatment of the lumbar spine (as related to secondary disc-related disorders).

- A framework for prescription of affliction-specific exercises for the lumbar spine (as related to secondary disc-related disorders).

Participants will receive access to the on-line portion of this course within 2 business days of registration*.

It is STRONGLY recommended course participants complete the on-line portion of this course PRIOR to the in-class portion.

*Access will be set-up for the on-line portion of this course within 2 business days of registration OR within 90 days of the live portion of the course

Cancellation Policies: Refunds, less 15% administrative fee, are allowed only when written cancellation is received at least 30 days prior to the day of the course OR tuition monies may be transferred to another IAOM course. A $40 re-registration fee applies to tuition transfers. A no-show fee of 50% is applicable. These policies are strictly enforced.
